To Whom It May Concern:

**Promoting workshop on the Green Building Index**

Green Building Index (GBI) is Malaysia's green rating system for buildings and township, created to promote sustainability in the built-environment and to raise awareness of environmental issues among the industry practitioners and the public. The GBI rating system provides an opportunity for designers, developers, building owners and building users to design and construct green, sustainable buildings that can promote energy savings, a healthier indoor environment, better connectivity to public transport and the adoption of recycling and greenery for their projects to reduce the building's impact on the environment.

In line with our advocacy for sustainability, we provide workshop and courses to impart knowledge on development of green buildings. In this regard, we are pleased to inform that Mr. Mohsen Mesbah with Passport Number: i95756599, is authorized to promote the Green Building Index workshops, seminars and courses.

Enquiries can be forwarded to the undersigned.

Thank you.

Yours truly,

Dr. Herman Teo  
General Manager  
Green Building Index
